

AMERICOS

INDUSTRIES INC.

ADVANCED CHEMICAL SOLUTIONS
FOR THE TEXTILE INDUSTRY

- Enhancing Quality
- Improving Efficiency
- Powering Textiles

Company Profile

Based in Lahore, Pakistan | UK Office, Birmingham

About Our Company

Americos Industries is a dedicated manufacturer of textile auxiliary chemicals and the official distributor of D-Happening Company Limited, a Thailand based and recognised warp sizing manufacturer, and Genkim Ltd. Sti., a Turkey based textile chemical manufacturer, in Pakistan. We provide solutions for weaving, knitting, dyeing and finishing operations, combining technical expertise with high performance chemistry to help mills achieve higher efficiency, stronger yarns and consistent quality.

- Over two decades of experience in textile chemical manufacturing
- Focus on warp sizing, yarn preparation and auxiliary services
- Serving major weaving, knit and processing mills across the region and beyond

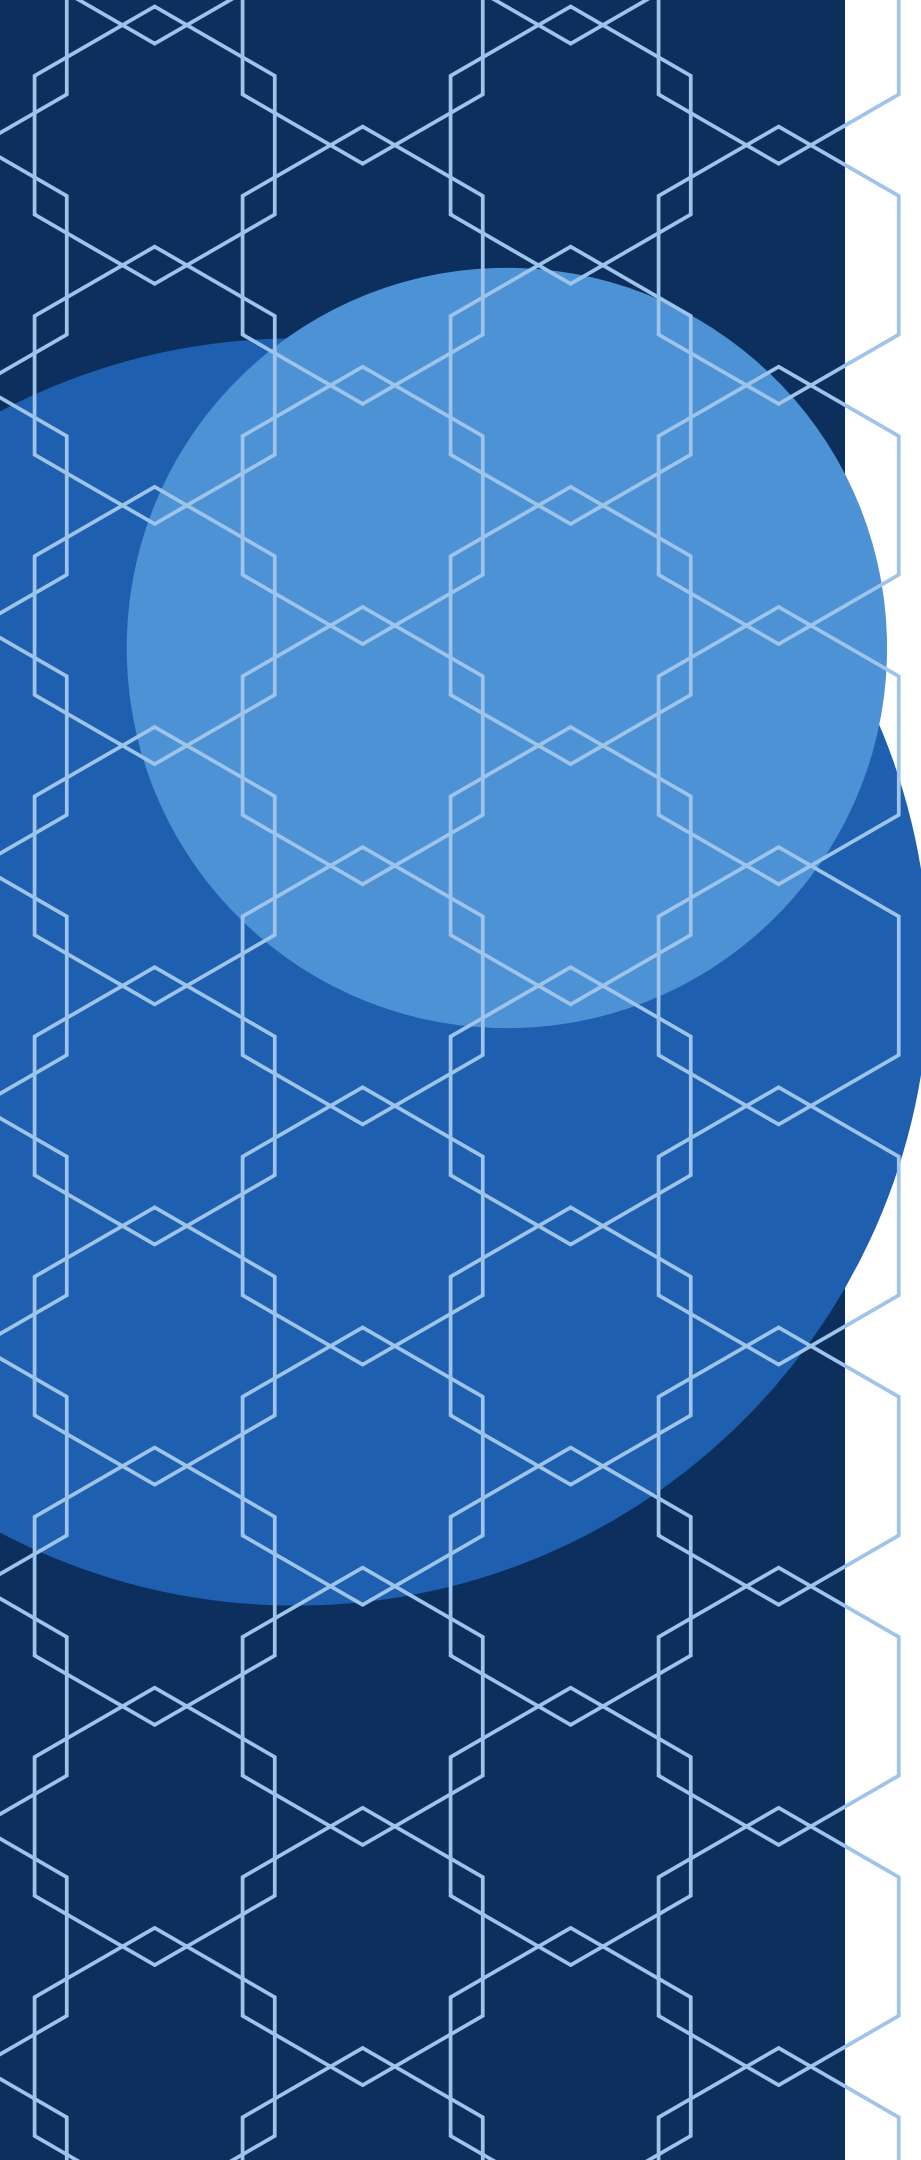

The Chemistry Challenge (Why It Matters)

Why Auxiliary Chemical Quality Matters in Textile Manufacturing

Every stage of textile production depends on the chemistry behind it. In dyeing, the wrong auxiliaries result in uneven shades, poor fixation and costly reprocessing. In finishing, weak or incompatible formulations affect handle, softness and durability, which directly impacts how the end product performs in international markets. For mills producing knitted fabrics, dyed yarn or garments, chemical quality is not just a technical consideration. It determines consistency, compliance and ultimately whether your product meets buyer specifications on the first attempt or the third.

Americos Product Portfolio

Americos offers a broad range of textile chemicals spanning the full processing cycle, each customised for fibre type such as cotton, polyester, nylon and blends, and for specific process conditions.

- Starch-based and modified-starch sizing agents (for cotton & cotton blends)
- PVA / polyvinyl alcohol / polymer sizing systems (for synthetic and blended yarns)
- Wax / lubricant / anti-static packages to support high speed weaving
- Specialized blends for filament yarns (polyester, nylon) and synthetic spun yarns

01 Sizing Solutions

- Filament Sizing
- Spun Yarn Sizing
- Spun Binders & Lubricants

02 Weaving & Fabric Preparation Auxiliaries

- Lubricants
- Antistats
- Wetters / Scouring Agents

03 Dyeing Chemicals

- Antichlors
- After-Clearing Agents
- Bleaching Assistants
- Chelating / Sequestering Agents
- Dye Carriers (Jet, Atmospheric & Pressure)
- Defoamers / Antifoams
- Dye Fixatives
- Dyeing Auxiliaries
- Optical Brighteners
- Tints

04

Finishing & Softening Systems

- Softeners (various types)
- Silicones
- Resin Finishing Agents
- Wrinkle Resistance Finishes
- Soil Release Finishes
- Handle Modifiers

05

Specialty Performance Chemicals

- Antibacterial & Antimicrobial Agents
- Enzymes & Enzyme Enhancers
- Liquid Alkalis & Buffers
- Machine Cleaners
- Industrial & Institutional Laundry Chemicals

Whether you are working with 100% cotton, polyester and spandex blends, nylon filament, or high speed rotor spun synthetics, Americos solutions are formulated for optimal performance.

- Filament polyester – high twisting, high speed weaving
- Nylon / filament – demanding sizing film for synthetic yarns
- Cotton & poly-cotton blends – require starch-/PVA-hybrid systems
- Spun synthetic yarns – need lubricant + binder packages to minimise hairiness

Technical Advantages Of Our Chemical Solutions

Consistent Shade & Fixation

Dyeing auxiliaries formulated for level, repeatable results across batches and fibre types

Improved Fabric Handle & Softness

Finishing and softening systems that enhance the feel and performance of knitted and woven fabrics

Compatible with Modern Processing Lines

Products tested for use on current dyeing, finishing and garment production equipment

Reduced Water & Chemical Load

Efficient formulations that lower chemical consumption and support mills targeting sustainability benchmarks

Eco-Friendly Solutions

Formulated for mills seeking ZLD or MRSL compliant chemical systems.

Process & Service Support

In addition to providing high performance products, Americos supports mills with process set-ups, application trials, additive optimisation and ongoing technical service. This means smoother start-ups, reduced stop-rates and quicker ROI.

- On-site trials and machine visits (through local agent)
- Technical data sheets, MSDS, compatibility tests
- Custom formulations for mill-specific yarns & speeds
- Reliable logistics and consistent supply chain

Sustainability & Compliance

Americos aligns its formulations with modern compliance demands such as GOTS, RSL, MRSL and ZDHC frameworks, low-impact sizing chemistry and chemicals suited for mills targeting export markets with strict environmental audits. As a corporate member of AATCC, the company applies recognised standards of textile chemistry.

- Formulations with reduced COD / BOD load in sizing liquor
- Low add-on, improved efficiency means less waste
- Technical support to help mills meet their sustainability goals

Why Choose Us?

- 01** Proven chemical expertise refined since the year 2000, optimised for high speed production environments
- 02** Sourcing from Thailand and Turkey ensures reliable lead time, consistent quality control and competitive pricing for our customers
- 03** Complete product range covering the full textile processing cycle, from pretreatment and dyeing through to finishing and specialty performance chemicals, all under one roof
- 04** Global reach through our UK office enabling reliable procurement, logistics handling and trading support across international markets

Thank You

Please reach out for product samples, formulation trials or full implementation. Our team is ready to support your requirements.
